

OnCollab AT-C/AT-H

One Click Cast Solution for Seamless Collaboration

AVA AT-C/AT-H is the perfect complement to our integrated collaboration system. Both AT-C and AT-H deliver the true speedy one click casting experience that will enhance your workspace.

After a simple pairing process, you can simply click the button to cast your screen seamlessly. AT-C and AT-H also will detect collaboration peripherals, such as speakerphones, microphones, and webcam automatically, allowing you to video conference with ease.

Our OnCollab AT comes in 2 versions, AT-C with a USB-C connection, and AT-H for an HDMI connection, giving you more freedom to build your workspace or classroom.

Product Features

Perfect for Guests and Visitors

No more installing applications to a visitor's computer, or linking guests to a separate office network. Spare yourself the hassle of registering networks and installing applications.

AT-C / AT-H is a one stop solution for guests and visitors alike. Simply plug the OnCollab device into their laptops, and they can immediately cast their screen.

Secure Environment

AT-C and AT-H allows you to cast without requiring native casting, third party applications, or even being connected to any network. It is the most secure casting method available in the market.

Simply plug and click, and you can cast your screen in a secure environment to present, discuss, and collaborate.

Product Features

Plug & Cast

No installation required.
