- OTG Cable (Micro USB) for Android mobile or tablet
- Quick Start Guide
- DVD-ROM with driver and software
- Android Cyberlink PowerDirector app serial sticker (Offer during promotion)

System Requirements

Mac (Mac OS)

- Mac OS X 10.9 or later

PC/Laptop (Windows)

- Microsoft Windows 7 / 8 / 8.1 / 10 operation system
- Intel Core 2 Duo 2.4GHz or higher (recommended)
- 1GB RAM of system memory or above (recommended)
- One available USB2.0 port
- Graphics Card (Must support DirectX 9.0c)
- Sound Card (AC97 compatible sound card)
- 1GB Free HD Space
- DVD-ROM Drive (For software installation)

Tablets/Mobiles (Android)

- Android 5.0 or later

Use on Mac OS

Hardware Installation

Connect Video Capture stick to video source with Composite or S-video video input and audio input. Connect to Mac or MacBook with USB side.

Driver Installation

Insert the DVD or download the driver from Narvitech website. Double-click the driver folder and complete the driver installation. The driver is essential to record videos with the product on QuickTime Player.

Capture Video on QuickTime Player

Double-click to open the QuickTime Player software. If you cannot find the software, search it in Finder to locate the software.

Open File > New Movie Recording to open QuickTime Player in preparation to record movie clips.

When QuickTime Player is opened, click the arrow button next to the record button; select the desired video and audio source inputs, as well as the quality.

↓ ●-	— ()))	~	16 C // 2

		Microphone Internal Microph ✓ USB 28286 Dev	ione ice
		Quality ✓ High Maximum	

When your video shows up in the QuickTime Player windows, click the record button at the center to begin recording your video clip.

Press the stop button at the same location to end recording. You will be directed to a preview window screen.

After the video recording is stopped, press the exit button to close the video preview window and save the file. You can use iMovie or other software to edit the video.

Use on Windows PC/Laptop

Hardware Installation

Connect Video Capture stick to video source with Composite or S-video video input and audio input. Connect to PC or laptop with USB side.

Driver Installation

Insert the DVD and run the installation package, or download the driver and software package from Narvitech website and unzip. Go through all the installation steps to complete the driver and software installation.

Software

CyberLink PowerDirector 12

VivaStation

Capture Video on CyberLink PowerDirector

Double-click on the CyberLink PowerDirector icon to open the software. When prompted, select "Full Feature Editor" to open the complete program.

Select the "Capture" tab
